

Research Project for Problem Solving

Learning Objectives:

- Learn and understand the six steps in the problem solving method
- Understand when to consult and compromise

Please do your research on the topics below and create a PowerPoint presentation of your findings to present in front of class Today:

1. What is problem solving?
2. What is problem solving process?
3. What is the basis of the problem?
4. What is causing the problem?
5. What is the goal?
6. What must be accomplished?
7. What is the big picture?
8. What are the facts?
9. What is preventing the goal or task from being accomplished?
10. How might the problem be eliminated?
11. How might the goal be adapted?
12. Was the solution successful?
13. Would another solution have worked better?
14. Should the solution be repeated?
